Sales Performance Analysis & Recommendations

Business Insights | Power BI | 2024

Executive Summary

Overall sales performance is below target by 8.58%.
Total Sales: 1.63B | Target: 1.78B | Profit: 362M
All four regions missed their targets in 2024.

Possible Reasons

- Sales below target: -8.58% gap (153M shortfall)
- North region worst: -10.1% below target
- South region: -10.0% (close second)
- Mobile: lowest product sales (168M)
- Clothing category: weakest overall (-9.7%)
- April worst month: -16.7% sales gap

Key Problems

- North & South pricing not competitive vs East
- Mobile demand declining — no bundle strategy
- April & February drop = post-quarter demand gap
- Clothing category lacks regional demand alignment
- Karachi only city with positive sales gap (+17.11%)

Recommendations

- North region: Review Jacket & Shirt pricing immediately
- Mobile: Introduce bundle offers or 10-15% price cut
- Clothing: Focus inventory on Karachi & Faisalabad
- Replicate March strategy — least loss month (-3.9%)
- Increase Q1 campaigns to avoid Feb/April drop

Conclusion

Targeting North region pricing and Mobile category can recover approximately 40-50M in lost revenue. Focus on Q1 demand strategy to avoid repeat losses.
